

# GARDEN CHECKLIST

April 2013

- Time to plant those warmer season veggies, i.e. tomatoes, peppers, okra, squash, cucumber and zucchini.
- Watering is key, it's already been a couple of dry years so keep to the watering schedule and don't let it lag. Prep for harvest of your early or cool weather veggies.
- Feed your plants, it's always a good idea to give your plants a jump start with a little organic manure or compost tea.
- Mulch, mulch, mulch. Mulching makes your water go farther and last longer, it also keeps the weeds and grass at bay.
- Look over your planting schedule, and make sure that you have all you need for each type of veggie you want to grow.

*Based on a personal garden schedule specific to Central Oklahoma. Check your Plant Hardiness Zones for a planting schedule more specific to your location.*
