

GARDEN CHECKLIST

July 2013

- Watering is key, have a good schedule and stick to it!
- Mulch, yep again, and again if need be.
- Shade, protect more delicate plants with shade cloth.
- Harvest regularly, an unpicked fruit is a drain on your plants.
- Watch out for pests, they like to prey on weak, and heat stressed plants.
- It's never too late, if you lose a plant many standard garden veggies can still be replanted.

*Based on a personal garden schedule specific to Central Oklahoma.
Check your Plant Hardiness Zones for a planting schedule more
specific to your location.*
